### **WIRE ROADS**

BRITISH JOURNALIST TELLS OF USE OF FORD IN THE HOLY LAND

W. T. Massey noted British journalist, now recording the Prince of Wales' tour through Canada and the United States, for the London Daily Telegraph, of London, England, was official war correspondent with the English Army-under General Allenby-which wrested the Holy Land and Syria from the Turks.

When telling of his experiences according to B. L. Graves, manager of the local branch of the Ford Motor Company, he says that he "used a Ford in many a journey from Beersheba to Jerusalem and to Nazareth, Damascus and Alepp," and that "in Allenby's final push this trusty old car took me more than 4000 miles in six weeks and I believe within one year it traveled over 30,000 miles in a country where roads are few, and these the worst in the world."

"In the Sinai country it is very sandy and it is quite a common sight to see a Ford running along with two rolls of wire netting secured to the foot boards. When the car gets to a place where the sand is impassable the driver unrolls the netting over the roadway and thus an easily passable wire road is constructed; in fact, in some parts of the country permanent wire roads have been made and over these the car runs along easily and smoothly, at thirty miles an hour."

Mr. Massey also stated that the Ford played no small part in helping "to deliver the Holy Land and Syria from the Turks" and that his "old 1080 Ford was the most wonderful car in the war." So highly does he regard the merits of the Ford car that he has asked permission to address the men of the Ford factory, who make Ford cars, to tell them of his experiences and thank them for their good work in building such reliable motor cars. He expects to visit the Ford factory on the day the Prince of Wales visits

#### PEACE RE-MADE MISSISSIPPI VALLEY

(By United Press)

ST. LOUIS, Nov. 14.—Sausages and other food specialties are being ground out by factories here which a little more than a year ago were belching fodder for the War Lord

St. Louis factories have hit their peace-day stride and gained momentum in the twelve months since they were driving night and day to maintain maximum war production.

"Many lines have developed terial beyond a pre-war basis," says the latest report of the Federal Reserve Bank. The number of employes has increased in the last year and a shortage of labor exists. "Wages are from forty to one hundred per cent higher," the report says, adding "many new industries have been established." The statement shows increases in business in virtually all lines with general conditions tending upward.

Street cars, steel rails, food supplies, clothing, farm implementsthe whole list of peace products are pouring again from factories here.

The Anheuser-Busch Company a year ago today had cleared its floor space and spent thousands of dollars preparatory to becoming one of the government's largest munitions store houses. The plant today is using the floor space to store sausages, feeds and light beverages.

"The conversion process" was utilized here. No plants were constructed especially for war uses. A few, planned in the last war days, were converted before completion.

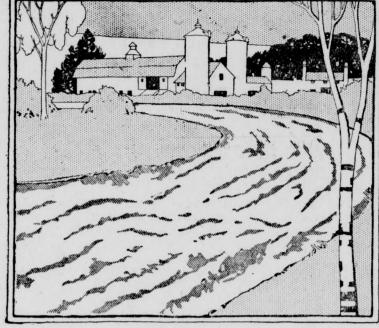

Plants building street cars made aeroplane bodies during the war. They are making street cars today. Khaki makers now are turning out overalls and jumpers. Food shippers sell now to the domestic trade instead of the army.

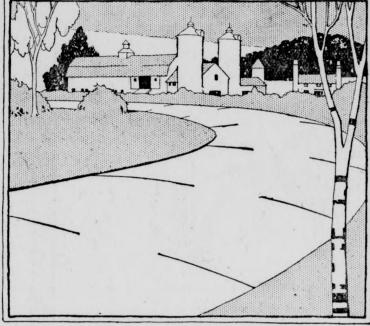

Peace brought war-in labor cir-

# The Road—In New Overland 4 on Three-Point Cantilever Springs

YOU expect a bad road to ride as it looks. It did, until the introduction of the Overland 4 Springbase.

Overland 4 does not change the road, but it does change the manner in which you can ride on it. It gives you comfort instead of dis-comfort. It gives you a smooth, sailing sensation instead of bouncing and swaying.

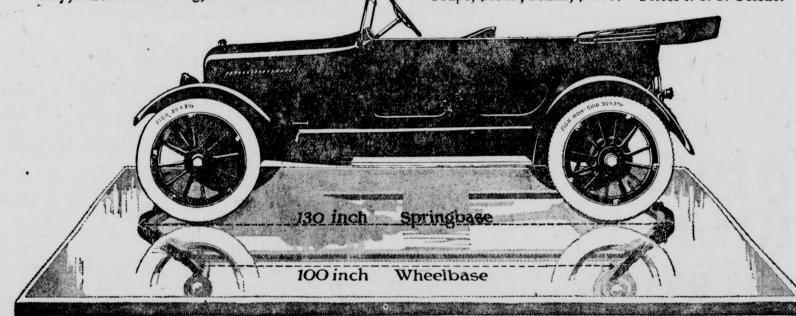

The Diagonal attachment of Three-Point Cantilever Springs at the ends of a 130-inch Springbase gives long wheelbase road steadiness. Yet Overland 4 retains all the advantages—lightness, economy, and ease of handling, of 100-inch wheelbase.

This means an altogether new standard of riding comfort, a noteworthy reduction in the wear and tear which lessens the efficiency of a car. The new springs give longer life to every part and thus minimize upkeep and replacement costs.

Tires wear longer because cushioned against hammering blows. Light weight means marked economy in gas, oil and running expense.

Overland 4's equipment is complete from Auto-Lite Starting and Lighting to Demountable Rims.

Come in and see this remarkable car. Ask for booklet. Overland 4 Touring, \$845; Roadster, \$845; Coupe, \$1325; Sedan, \$1375. Prices f. o. b. Toledo.

# "Ah, That's Some Heat!

I'm mighty glad we got this oil heater from the Glendale Hardware Co. I don't what we'd do without it, with coal so high and gas bills running up. This dandy little oil heater certainly throws out some heat, by Jove! I'm surprsed at the economy of it too. Burns only a gallon of kerosene in about ten hours. I think I'll get a couple more for the house from the Glendale Hardware Co."
